SUMMARY

Full Stack Developer with 2+ years of experience building, deploying, and maintaining web applications with PHP (Laravel, CodeIgniter 4), JavaScript, React.js, HTML, and CSS, on MySQL/MariaDB and PostgreSQL. Delivered production systems used daily, including an academic information system used by all students at Politeknik Negeri Lampung and a national competition platform used by around 20 polytechnics. Experienced in translating business and user requirements into working systems, integrating third-party APIs, testing and troubleshooting across the stack, writing technical documentation, and using AI coding tools such as Claude Code and Cursor. D3 graduate in Informatics Management (GPA 3.89), currently pursuing a Bachelor's in Informatics.

EXPERIENCE

Politeknik Negeri Lampung *Dec 2023 – Present*
Freelance Fullstack Developer | Remote & on-site, part-time

- Gathered business and user requirements from non-technical clients and translated them into system workflows, ERDs, database schemas, and full-stack applications built with PHP (Laravel, CodeIgniter 4), JavaScript, HTML, and CSS.
- Deployed applications to production and maintained 3+ live systems used daily, handling troubleshooting, bug fixes, revisions, and new features within existing codebases.
- Worked independently with minimal supervision and full ownership of deadlines, communicating directly with users throughout delivery.

PT. Enigma Cipta Humanika *Nov 2025 – May 2026*
Backend Developer Intern | Jakarta Selatan

- Joined as a Backend Developer Intern building services in Go, then reassigned to the frontend team mid-project to support development needs.
- Built and maintained RESTful APIs in Go during the initial phase, implementing CRUD for 4 core modules: Ticket, User, Tenant, and Profile Management.
- Enhanced data handling with pagination, filtering, and role-based user management.
- Developed frontend features with React.js and TypeScript after moving to the frontend team, managing state with Zustand and integrating features with backend APIs with correct request/response handling.
- Investigated and resolved application bugs to improve stability and reliability, and took part in User Acceptance Testing (UAT) before release.
- Worked in an Agile/Scrum team through Sprint Reviews, Sprint Retrospectives, and Backlog Grooming sessions.

Tech: *Go, React.js, TypeScript, Zustand, PostgreSQL, Docker*

PT. Enigma Cipta Humanika (Enigma Camp) *Mar 2025 – Nov 2025*
Fullstack Developer Trainee | Kota Malang

- Built REST APIs with Java Spring Boot and JPA on PostgreSQL and wrote unit tests to meet a minimum 80% code coverage requirement.
- Built responsive web interfaces with React.js and mobile apps with React Native; containerised services with Docker on Linux and documented APIs with Postman and Swagger/OpenAPI.

PT. Indonesia Trans Network *May 2022 – Aug 2022*
Network Operations Center (NOC) | Full-time · Lampung Timur

- Monitored network operations and handled incident escalation, troubleshooting, and maintenance of MikroTik and Cisco equipment.

PROJECTS

E-Kuliah — Academic Information System | *PHP · CodeIgniter 4 · MySQL* kuliah.polinela.ac.id

- Built CRUD for 7 core master data modules (students, lecturers, technicians, academic years, staff, classes, departments) in an existing codebase used by all students at Politeknik Negeri Lampung, and maintained live features.

AITeC VI — National Competition Platform | *PHP · CodeIgniter 4 · MySQL* aitec-lampung.polinela.ac.id

- Built the official registration platform in a 3-person team; live and used by around 20 polytechnics across Indonesia and Timor-Leste.
- Designed the database schema and registration workflow, and built the admin dashboard end to end for reviewing registrations and publishing results.

PEMIRA Polinela — University E-Voting System (Team Lead) | *Node.js · React · PostgreSQL · Docker*

- Led a team of 3, designing a separated frontend and backend with JWT authentication and Cloudinary integration, and a database schema that keeps vote records accurate and auditable.
- Built authentication, voting logic, vote counting, and the admin dashboard; now leading its redesign to Node.js, React, and Docker-based deployment on a VPS.

LastBite — Food Waste Reduction Platform (Capstone) | *React Native · Spring Boot · PostgreSQL*

- As the mobile developer in a 5-person Agile team, built authentication, food listing, ordering, and profile features, integrated Midtrans payments and Cloudinary, and agreed API contracts with the backend developer.

SKILLS

Web Development: PHP (Laravel, CodeIgniter 4, Composer), JavaScript, HTML5, CSS3, React.js, TypeScript, Node.js
Other Backend: Go (Golang), Java (Spring Boot), RESTful API, JWT, role-based user management
Databases: MySQL/MariaDB, PostgreSQL, SQL, Prisma, JPA, Firebase Firestore
Integration & Data: Third-party APIs (Midtrans, Cloudinary, Firebase), REST API integration, Microsoft Excel
DevOps & Quality: Git/GitHub, Docker, Linux, VPS deployment, unit testing, UAT, debugging and troubleshooting
Documentation & AI: Technical/API documentation (Swagger/OpenAPI, Postman), Claude Code, Cursor
Languages: Indonesian (Native), English (Basic)

EDUCATION

Bachelor of Informatics (S1), in progress — Asia Cyber University Apr 2026 – Present
D3 Informatics Management — Politeknik Negeri Lampung · GPA 3.89/4.00 Graduated 2025

CERTIFICATIONS

- Fullstack Developer Bootcamp — Enigma Camp (2025)
- Junior Web Programmer — BNSP (2025)
- ACA Developer Certification — Alibaba Cloud Academy (2025)
- Neo4j Certified Professional — Neo4j (2026)
- NDG Linux Essentials — Cisco Networking Academy (2023)

ORGANIZATION

Polinela IT Center — Hima Prodi Manajemen Informatika
Vice Chairperson

- Organised IT knowledge-sharing sessions with external speakers and led team-bonding activities within the organisation.
